Equipo 7

Marzo 7, 2026

Dado que esta es todavía una primera versión de nuestro esquema final. Nuestra intención entonces es que el modelo represente los aspectos clave dentro de la composición del juego. Como quién juego, cuáles son los personajes, qué cartas hay, y más aspectos importantes del GDD.

Con experiencia del modelo para Pokémon Live, nos parece que estas sería una distribución de entidades adecuada (con lo que llevamos):

- Player
 - o Para almacenar a cada usuario por su progreso global, registrando experiencia, historial y desbloques. Guarda la cuenta y el progreso del jugador, registrándolo en el juego.
- Character
 - o Considerando que habrá cuatro personajes jugables, se guardarían los distintos atributos de cada uno.
- Player_Character
 - o Tabla intermedia para asociar los personajes con el jugador (puede que los pongamos por desbloqueo, excepto por el primero).
- Card
 - o Representa cada carta y sus atributos.
- Player_Card
 - o Asociación de qué cartas ha desbloqueado el jugador. Sirve para crear decks (mazos).
- Deck
 - o Representa las cartas en mano o en el mazo del jugador. Utilizado antes de una run, o durante la preparación.
- Deck_Card
 - o Entidad asociativa entre las cartas del jugador y un mazo creado.
- Run
 - o Modelaje de la partida, para guardar el progreso del jugador por cada una.
- Zone
 - o Representación de los mapas y etapas.
- Run_Zone
 - o Permite saber qué zonas recorrió el jugador en una run y en qué orden.
- Enemy
 - o Almacena los enemigos del juego, incluyendo enemigos comunes y bosses.
- Battle
 - o Registra cada duelo por el que el jugador pasa, y sus resultados.
- Reward
 - o Para almacenar las recompensas por evento o duelo superado. Puede dar cartas nuevas, XP, mejoras o desbloques.
- Battle_Reward

-
- The diagram illustrates a database schema for a game, featuring several tables and their relationships. The tables are color-coded: red for player/character related, green for run/zone related, blue for enemy/battle related, and yellow for deck/reward related.
- Tables and Attributes:**
- player** (Red): PK id_player, username, nickname, email, total_swampXP, clan_credit, total_swampXP, first_login, last_login.
 - player_character** (Red): PK id_player_character, is_locked, level_character, used_times.
 - card** (Red): PK id_card, card_name, card_type, card_element, card_number, card_effect, effect_desc, base_damage, energ_e_gain, energ_i_gain, card_rarity, is_locked.
 - deck** (Yellow): PK id_deck, deck_name, is_active, creation_date.
 - deck_card** (Yellow): PK id_deck_card, FK1 id_deck, FK2 id_card, cards_included.
 - character** (Red): PK id_character, ch_name, ch_desc, base_hp, base_attack_b, base_defense_b, ch_ultimate, ch_ultimate_desc, is_locked.
 - player_card** (Red): PK id_player_card, num_cards_owned, is_locked, FK1 id_player, FK2 id_card.
 - run** (Green): PK id_run, start_time, end_time, run_result, zones_done, swampXP_earned, clan_credit_earned, FK1 id_player, FK2 id_character, FK3 id_deck.
 - run_zone** (Green): PK id_run_zone, order, status, claim_reward, FK1 id_zone, FK2 id_run.
 - zone** (Green): PK id_zone, zone_name, zone_map, zone_desc, zone_difficulty, FK1 id_player.
 - enemy** (Blue): PK id_enemy, name, desc, type, faction, base_hp, difficulty_set, ai_level, is_boss.
 - battle** (Blue): PK id_battle, battle_result, turn_count, player_hp_remaining, enemy_hp_remaining, start_time, end_time, FK1 id_player, FK2 id_character, FK3 id_run, FK4 id_zone, FK5 id_enemy.
 - reward** (Blue): PK id_reward, reward_name, reward_type, reward_desc, reward_value, FK1 id_card, FK2 id_character.
 - battle_reward** (Blue): PK id_battle_reward, player_choice, FK1 id_battle, FK2 id_reward.
- Relationships:**
- player** to **player_character**: 1:1 relationship.
 - player** to **player_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
 - player** to **deck_card**: 1:1 relationship.
 - player** to **run**: 1:1 relationship.
 - player** to **run_zone**: 1:1 relationship.
 - player** to **zone**: 1:1 relationship.
 - player** to **deck**: 1:1 relationship.
